EXPERIENCE

Revyrie Global, Trivandrum — Full Stack Developer

APRIL 2019 - PRESENT

- Implemented a broadcasting algorithm for hospitals in Los Angeles, to recruit nurses when demand was not met. This algorithm based on several factors finds nurses and generates sms and calls.
- Worked as a full stack web-developer. Handled Angular and Typescript in front-end and Node.js in back-end.

Teronext, Trivandrum — Full Stack Developer

MARCH 2018 - MARCH 2019

- Worked in a small team of 1-5 members to develop applications for packers and movers.
- Implemented AI assisted software for easy moving services. Worked as a full stack web-developer. Handled Angular and Typescript in front-end and PHP, Node.js in back-end.

MAIN PROJECTS

Sipsetter — Sipsetter is an E-commerce app for selling wines across the US.

- Lead the development team in creating this e-commerce app.
- Created several plugins for this e-commerce app, including a gift card in e-commerce, created most of the plugins used in famous e-commerce plugin Shopify.
- Created plugins include subscription products, stripe payment plugin, promotions plugin, shipping plugin for shipping across US.
- **Technologies used:** NestJS, GraphQL, PostgreSQL, AWS Lambda, AWS S3, Angular, Next.js

SKILLS

HTML/CSS, JavaScript

Angular, React, Vue.js

Node.js, PHP

Express.js, NestJS, LoopBack, GraphQL

PostgreSQL, MongoDB

Git, AWS Lambda

NPM, Yarn

PORTFOLIO

Dev Music

<https://music.on.dev>

Dev Music is an app for developers to listen to distraction-free music playlists to increase productivity and focus

MAIN PROJECTS

Go RN — *Go RN is a platform for finding the solution to meet increased demand for all healthcare facilities*

- Worked together with a team in creating a cross platform application that recruits nurses. Our application is doing a major role in helping hospitals and patients during this corona pandemic.
- Implemented a system that recruits nurses for hospitals when demand is not met. It consists of an algorithm to find nurses based on several criteria, used AWS lambda, cloud-watch for dynamically executing the algorithm, and used Twilio for sending and receiving calls and sms via the broadcast nurses algorithm.
- **Technologies used:** Loopback, PostgreSQL, AWS Lambda, AWS S3, Angular, Twilio

Hubster — *Hubster is a platform for entertainment industry professionals.*

- Worked in a team of 15-20 members in creating a cross platform for buying and selling services and products.
- Implemented a dynamic product gallery system with image editing.
- **Technologies used:** Loopback, Angular, Typescript, MongoDB

OTHER SKILLS

TensorFlow.js, Unreal Engine.
WordPress

LANGUAGES

English, Malayalam

EDUCATION

Christ Nagar College, Trivandrum — *BS in Computer Science*

MAY 2014 - MAY 2017

GVHSS, Kozhichal — *PLUS TWO*

JUNE 2012 - APRIL 2014

Full Stack Developer Training, MashupStack — *Trivandrum*

JUNE 2017 - MARCH 2018

NodeJS Full Stack with Angular Training from MashupStack
